Full stack software engineer with 7 years of experience in sales, management, customer service, and operations. With a background in the hospitality industry, I bring the necessary soft skills to work in a collaborative environment, especially in pair programming. I enjoy creating dynamic web applications by writing clean, readable code. Experienced in Ruby and JavaScript frameworks.

Technical Skills

Languages: JavaScript, Ruby, HTML, CSS, SQL

Frameworks/Libraries: React, Redux, Ruby on Rails

Database Management: PostgreSQL, SQLite

Other: Git, GitHub, WebSockets, Semantic UI

Technical Projects

Wednesday - [GitHub \(Frontend\)](#) | [GitHub \(Backend\)](#) | [Live Site](#)

Collaboration and chatting application based on Slack

- Built with Ruby on Rails to control database management and React/Redux to control frontend and user experience
- Utilized JSON Web Tokens and LocalStorage for user authorization and authentication
- Implemented Websockets via ActionCable to enable real time chat between users
- Applied Semantic React UI and custom CSS for styling

GrumpyBird - [GitHub](#) | [Live Site](#)

Flappy Bird inspired clone created with HTML, Javascript, and Canvas

- Created game structure and gameplay with Vanilla JavaScript and Object Oriented Programming
- Utilized Webpack to load JavaScript and bundle scripts
- Rendered components (bird, background, pipes) using HTML5 Canvas
- Created collision detection algorithm between bird and pipe to account for scores and end of game
